

The Canadian Ecology Centre (CEC) www.canadianecology.ca
has produced a number of videos for Northern Ontario Tourism.

Google: Back Roads Bill Devil's Rock or Eau Claire Gorge or The Crack...
these are one minute in length, plus the added value files...
it is all in our back yard!

To increase the metrics for the next round of videos you could **LIKE**

The Canadian Ecology Centre
Centre écologique du Canada

It is appreciated by the CEC and our pursuits as as one of Canada's leading
outdoor, experiential, environmental learning centres. Enjoy the seasons with
family and friends and be "with" nature.

BECKONING

What did it take to get here?
Some thoughtful time.
And now, the destiny of effort is there.
A straight drop, a sparkling jewel,
Below, the rippling whirlpool.
Falling hard and loud in majestic white
Immense in power; beauty of sight.
The water above yields to gravity, falling
It drops aloud and is always calling.
This deafening sound,
Can you hear the words? You can.
A lasting natural beauty, flowing,
A natural wonder, always growing.
On me it does, I am haunted and stand in its wake.
This time, the energy, this memory I will always take.

Back Roads Bill - April 2014

Agawa Falls, next to Niagara Falls... the highest vertical drop; north of Sault Ste. Marie,
boundary of Lake Superior Provincial Park and ACR R.R.
